MICRO SWITCHES

By carrying a stock of Micro Switches, Part No. 52461, together with the various trip wires for different model phonographs and wall box units, it will enable you to service all of these units with a minimum of stock.

Below we are listing the model number of the unit together with the micro switch and trip wire assembly part number indicated for each. In the third column we list the actuator wire only and in the fourth column the part number of the micro switch originally used on the unit when it was manufactured. In columns five and six we show the part of a micro switch that may be used as a substitute on each of these units.
